

Selected day — three ways to answer “what happened, and am I okay?”

When a day is selected, this region uses the full snapshot (\$3): **every transaction, every fund jar**, the **free amount**, and Q3 “am I on track?” answered *per expense type* — a goal shows its milestone and a relative due (“8 months away”); a bill shows whether it's *on track* vs. *fully covered now*; a paycheck sits above the allocations it funded. Same sample day below — a tight deallocation day — three ways.

A Type-grouped sections

Money in / out / raided, then jars grouped by kind — each rendered for its type (goal milestone bar; bill coverage; cushion target).

- + Each expense type gets its natural treatment
- + Paycheck → its allocations reads clearly
- Tall — lots of vertical space
- Many section headers

Friday, August 1

B Two-pane: jars + the day

Left rail = every jar with per-type status; right = the day's transactions, paycheck heading its allocations.

+ Compact — jars and events side by side

+ Closest to today's two-grid layout

– Per-type nuance is squeezed into rows

– Narrow on small screens

WHAT HAPPENED TODAY

IN

Paycheck

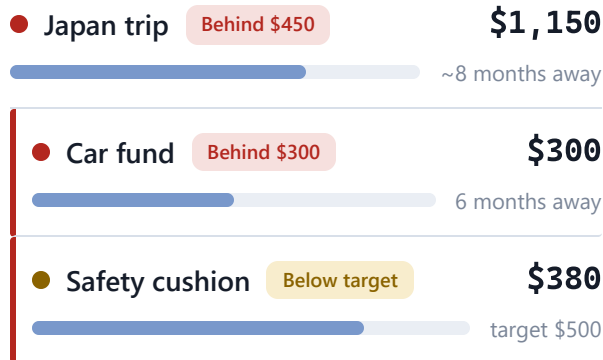

+\$1,700

↳ Japan trip

-\$150

↳ Rent reserve

-\$350

BILL	Rent	-\$1,200
EXPENSE	Car repair	-\$1,400
PULLED	Car fund	-\$300
PULLED	Safety cushion	-\$120

Left: every jar, per-type — a bill's bar turns green when fully covered; a goal shows progress to its milestone; raided jars get a red rail. Right: every transaction, paycheck first with its allocations nested beneath.

c Summary-led

A plain-language health sentence up top (free today, what got raided, which goal is behind), then compact detail.

+ Answers "am I okay?" in one read

+ Q4 "adjust the plan" nudge is prominent

– Summary must be generated carefully

– Detail is secondary / terse

FRIDAY, AUGUST 1 **DEALLOCATION DAY**

A tight day: **\$0 free** after a **\$1,400 car repair**. To cover it the app **pulled \$420** from your Car fund and safety cushion. Your **rent is fully set aside**. But the **Japan trip is \$450 behind** (due ~8 months out) — **consider adjusting its plan**.
